SUMMARY

Software Engineering student at Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA), seeking a 6-month internship to contribute to data-driven and digital solutions. Experienced in machine learning and web development, including a car damage detection system. Currently building skills in Microsoft Power Platform (Power BI, learning Power Apps), with a strong interest in improving business processes and decision-making.

EDUCATION

Bachelor of Computer Science (Software Engineering) (Hons.) 2023-2026
Pekan, Malaysia

Universiti Malaysia Pahang Al-Sultan Abdullah

- Developed a strong foundation in software engineering principles, focusing on programming, algorithms, and data structures.
- Worked on a Final Year Project developing a machine learning-based car damage detection system using Python, TensorFlow, and OpenCV, integrating image preprocessing for automated inspection.
- Designed and developed software solutions using Python, Java, C, and web technologies (Laravel, WordPress, HTML), managed databases using MySQL, integrated with PHP-based applications and gained experience in 3D modelling using Maya.

Diploma in Computer Science (Information Technology) 2018-2022
Pekan, Malaysia

Universiti Selangor (UNISEL)

- Developed a strong foundation in Information Technology principles, focusing on programming, IT Infrastructure and Web Development.
- Developed programming skills in Java and C#, including building a banking system application
- Developed a Online Property Management System web application using HTML, CSS, and JavaScript
- Gained practical experience in web development, database integration, and software project implementation

WORK EXPERIENCE

Centre for Community Engagement (COMNET) , UNISEL – Selangor SEPT 2021 – DEC 2021
Web Developer Intern

- Managed and maintained the company's website, ensuring performance, updates, and implementing SEO strategies
- Developed and deployed 20+ full-stack WordPress websites for small businesses using PHP and database integration
- Translated client requirements into functional, user-focused web solutions
- Collaborated with team members to deliver projects on time
- Provided training sessions to ~100 students on website development
- Represented the organization at the SDEC conference, engaging with industry professionals

AWARDS AND CERTIFICATION

November 2025
Hackathon UMPSA x Huawei 2025 (Track B) Winner of Best Game App
- Built EcoSnap, a Flutter-based social game app with strong UI/UX

November 2025
Hackathon Top 10 Finalist, Innovation Mobile App Competition UMPSA x Huawei 2025 (Track B)
- Contributed to EcoSnap development using Flutter (Team AceEngineers)

November 2025
Hackathon UMPSA x Huawei AppGallery Mobile App Competition 2025 (Track A)
- Designed and pitched DengueSense, a mobile app for dengue risk awareness

August 2025
Hackathon X UMPSA – SamanSphere (Web Application)
- Developed a Laravel-based platform to centralize multi-agency summons payments

December 2025
Datathon 2025, Universiti Malaya
- Performed financial data analysis and built time series forecasting models

December 2025
Google Cloud Engineering Badge
- Hands-on experience with cloud infrastructure (IAM, VPC, Compute Engine)

December 2025
AWS Cloud Practitioner Essentials
- Knowledge of cloud services, security, and AWS global infrastructure

July 2024
CCNA: Introduction to Networks
- Learned networking fundamentals and performed configuration labs

October 2021
ICT Training Certification (Web Development)
- Built and trained responsive websites using HTML, CSS, PHP, and Bootstrap

LANGUAGE

English (Fluent) ●●●●○
Bangla (Fluent) ●●●●●
Hindi (Intermediate) ●●●○○
Malay (Basics) ●●○○○

DIGITAL SKILLS

- Programming
- Machine Learning & AI
- Full Stack Web Development
- Mobile App Development
- UI/UX Design
- Software Testing
- Cloud Computing
- Power BI
- Ms Office 365

EXPERTIES

- Public Speaking
- Problem Solving & Analytical Thinking
- Research & Development
- Technical Training & Knowledge Sharing
- Team Leadership & Collaboration
- Critical Thinking
